

Nishma Maskey

Product owner with expertise in agile methodologies, specializing in user story development and backlog prioritization to achieve project deadlines and exceed goals. Strong technical foundation in ecommerce, facilitating effective collaboration between business needs and technical solutions.

EXPERIENCE

Third and Grove Boston, MA - *Technical Product Owner*

Dec 2024 - Current

- Led end-to-end delivery of Shopify Plus initiatives, translating business requirements into scalable technical solutions that improved user experience and site performance
- Defined product roadmap and feature scope, balancing stakeholder needs with technical feasibility and business impact
- Prioritized product backlog for cross-functional teams (engineering, design, marketing), aligning features with business goals and facilitating timely delivery
- Collaborated with developers on technical requirements, and custom Shopify functionality to support project objectives
- Utilized GA4, user behavior insights, and A/B testing to inform decisions that optimized conversion rates and enhanced customer journeys
- Improved site performance and usability, contributing to increased engagement and conversion across key pages
- Facilitated Agile ceremonies (sprint planning, standups, retrospectives) to ensure efficient delivery and team alignment

Sea-Land Distributors, New Orleans, LA — *Lead Front End Developer*

Dec 2020 - Nov 2024

Front End Developer

Dec 2020 - Nov 2024

- Led cross-functional team (development, design, marketing) to build and scale Shopify Plus storefronts supporting \$15M+ in annual revenue
- Developed and implemented scalable front-end architectures, improving site performance, maintainability, and responsiveness
- Owned website performance metrics, including conversion rate, SEO, accessibility, and page speed; implemented data-driven improvements based on analytics insights
- Optimized customer journeys and landing pages to enhance engagement and boost conversion rates
- Built static sites using React, Material UI for over 10 private label brands using latest development trends
- Mentored developers and streamlined team workflows, enhancing delivery efficiency and ensuring high code quality.
